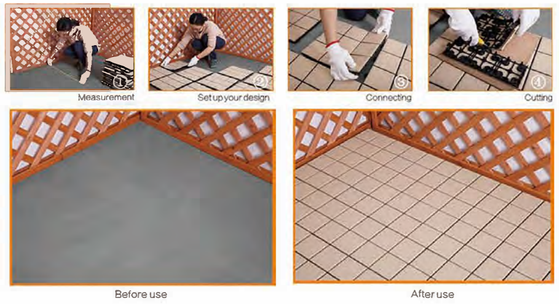
What is Click-Clack Decking Tile

The Click-Clack decking tile is a new concept generated from the traditional floor, which is easier and quicker to lay.It is combined by one piece of traditional floor (which can be different material such as ceramic , granite, slate and so on) and one piece of plastic grid base underneath which has three showing out tabs on two sides and three corresponding slots on the underside of the other two sides. The base attached to the floor with special flexible adhesive,enable the whole system to interlock with each other pieces by using the showing out tabs of one tile to lock into the corresponding slots on the underside of the other tile by a single click-clack action,thus, we call it DIY Tile.
It does not need any adhesive, tile spacer or grout to hold them in place. The pieces are laid on the top of solid floor and clip together with a single action, without any need of building work and doesn't take much trouble, time and money.



Why Choose Click-Clack Decking Tile

Forgiving of cracked concrete surfaces

So if your old patio is suffering from cracks and minor pitting or other damages, firstly you don't need to repair the surface unless the cracking is too bad that there is a significant height difference on either side of cracks. In most cases, you can simply lay the deck tiles directly over the top of the existing concrete.

Base allows water to drain away freely

This means that the top surface will dry out as quickly as possible and will avoid any puddles from forming on the surface which could create a slip hazard.

Quick and easy to install, no skill needed

They are so quick and easy to install and don't really require any particular skills. Because of the built-in interlocking tabs, complete accuracy is assured when installing the tiles because they simply snap into place.

With extremely low maintenance

To remove surface dirt, just wipe with a wet cloth or wash with water using a sponge or a brush if heavily soiled. To remove more stubborn marks on the tiles, it may be necessary to use a mild household detergent. In this case, rinse well after washing to remove all traces of detergent.

Available in a wide range of materials

So not only can you cover your deck with wood tiles, but there are also slate deck tiles, travertine stone deck tiles, composite wood deck tiles and artificial grass deck tiles and so on. All these will basically have the same properties as the original surfacing materials.

Wide usage and application

And of course the tiles can be used on much more than just patios. They are ideal for use in apartment buildings on balconies and rooftops, especially since they can conveniently be carried out elevators or stairs and used where permanently fixed materials are prohibited.

Click Clack ®

立咔地板

The Click Clack system is a new concept generated from the traditional tile, which is easier and quicker to lay compare to the traditional tile. The pieces click together easily by a single click-clack action.

The installation is as easy as placing with Lego® block, even a child can do it!

Click Clack flooring application interact family members and friends with each other.
Thinking, discussing, adjusting and cooperating..... motivate endless creativity and motility.
Every corner is filled with elegant art.
Every click is in hand with happiness.

No mess, no adhesive, no grout.
No special tools & skills are required.
Durable, hard wearing and UV resistance.
Suitable for all outdoor applications.
With more than 200 items available.
Easy installation and free combination.

Ceramic series | ST-C

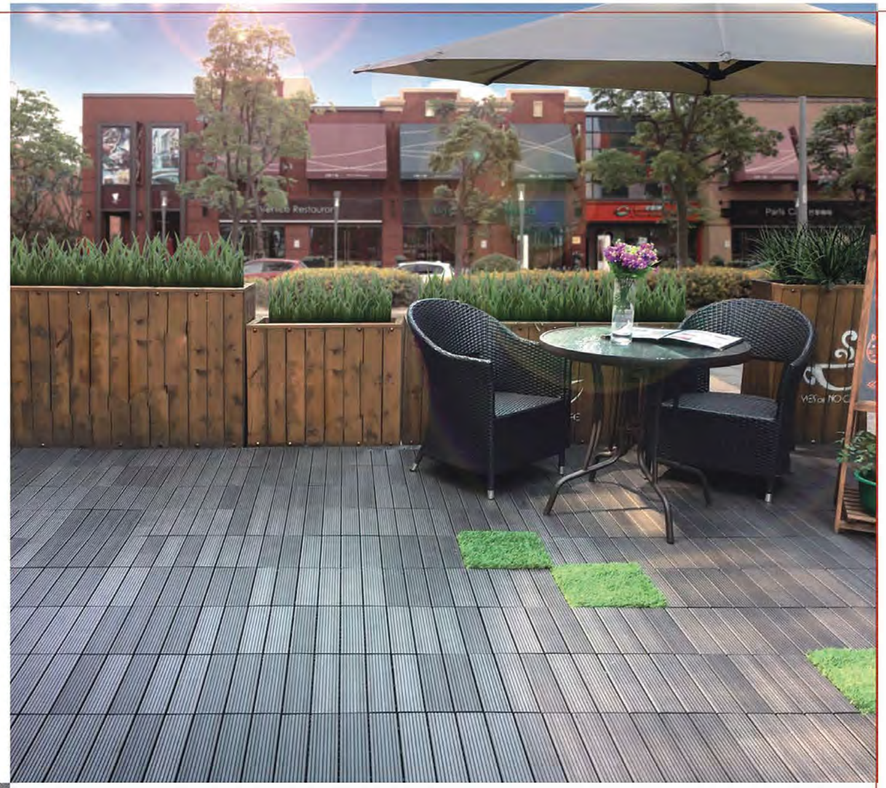
GARDEN

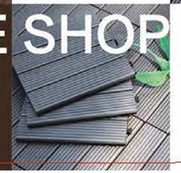
Freshness

The floor integrates into the flower, stone and the fountain.
The sunshine sprays on it.....
What a wonderful paradise!

Relaxation

A space of culture.....
The flavor of art is filled in the air,
which slowing down the pace of life!





COFFEE SHOP

Artificial grass series | G004
WPC series | SM-4P-A LDH

ARTIFICIAL GRASS SERIES
〔假草系列〕

Normal grass
Permeable grass

The artificial grass series looks like real grass, but comparing to the real grass, it does not need to maintenance. It has permeable backing and normal backing available.

G004 G012 G004-GREEN

CERAMIC TILE SERIES
〔瓷砖系列〕

0.8cm ceramic
1.0cm ceramic
Frost ceramic

The ceramic series is very convenient and economical. It has anti slip surface, durable and stable, no need any maintenance. It has 3 subseries available.

C051 N044 JBH008B

SOLID WOOD SERIES
〔实木系列〕

Fir wood
Acacia wood

The solid wood series is made by natural wood, which will bring you back to the natural world.It has different combination and wood species available.
